member of  eivis

Turning your line into usable insights

CONNECTING THE DOTS

TOGETHER, WE INNOVATE

Qcify is a proud member of eivis.

eivis is a strategic group of leading companies in the food industry, providing integrated solutions for food sorting, inspection, and process optimization. Built on trust, responsibility, and technological excellence, eivis brings together innovation from Chemical Imaging Technology, AI-powered automation, and intelligent vision systems – all committed to advancing safer, smarter, and more sustainable food production.

LIGHTS-OUT MANUFACTURING STARTS HERE

The future of our industry will be defined by how effectively we consolidate data to create a clear, actionable overview. This empowers decision-makers to focus on what matters: making the right choices instead of gathering or sifting through endless data.

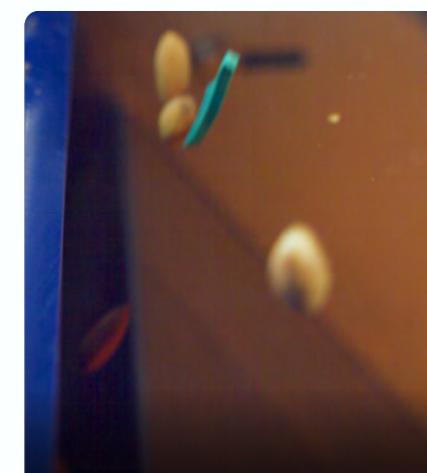

That's why Qcify has built a platform of interconnected solutions: so our customers can stop worrying about data collection. And we're taking it further. With Qcify AIR, EYE, RAY, 360 and HUB, we're moving closer to the reality of lights-out manufacturing.

Tomorrow's facilities will feature fully connected machinery, seamlessly sharing data through a central hub or dashboard in the cloud. This level of automation reduces reliance on labor and unlocks new opportunities for growth.

SUSTAINABILITY THROUGH SMARTER DATA

Sustainability starts with better data. In food processing, even small inefficiencies can lead to significant product loss and wasted resources. Qcify addresses this challenge by consolidating data across every step of the line, giving nut processors a clear overview and actionable insights.

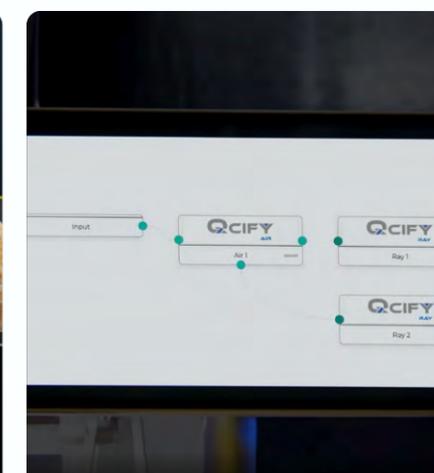

With Qcify, your facility gains a single hub of intelligence that simplifies processes and boosts efficiency. This not only streamlines decision-making but also minimizes waste, maximizes yields, and lowers energy and resource use. The result: more sustainable operations that protect margins while reducing food waste worldwide.

AI-Powered Sorting
AI-driven detection ensures precise analysis and accurate classification of defects and foreign materials, continuously updated for peak performance.

Plug-and-play Installation
Place it, plug in and sort. Qcify's ready-to-use sorting algorithms make operation frustration-free. No lengthy calibrations or training needed.

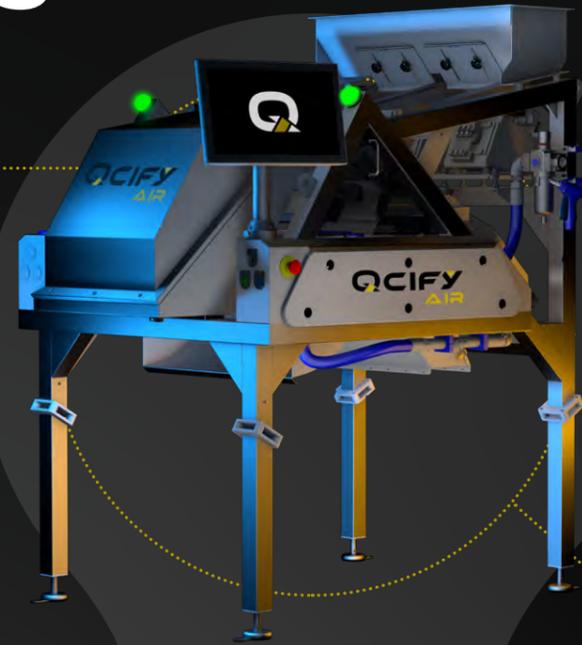

Future-Ready Integration
Easily integrates into your processing line. Connects with the Qcify ecosystem: gain centralized control, real-time data and adjustments through our intuitive dashboard.

YOUR NEXT NUT SOLUTIONS

QCIFY AIR

With high throughput and precision sorting using 6 mm pitch airguns, double-sided detection powered by 4K cameras, and smooth handling through an S-shaped chute, the system delivers unmatched performance. It functions fully without an operator.

QCIFY 360

Revolutionize your inspection process with our advanced quality control system. Equipped with six cameras, it ensures that nothing goes unnoticed. Simple to use and easy to install, it delivers reliability from day one.

QCIFY HUB

Monitor your whole line from one spot with a centralized system that brings all Qcify machines together. The HUB lets you visualize your processing line and simplify quality control from computer or mobile.

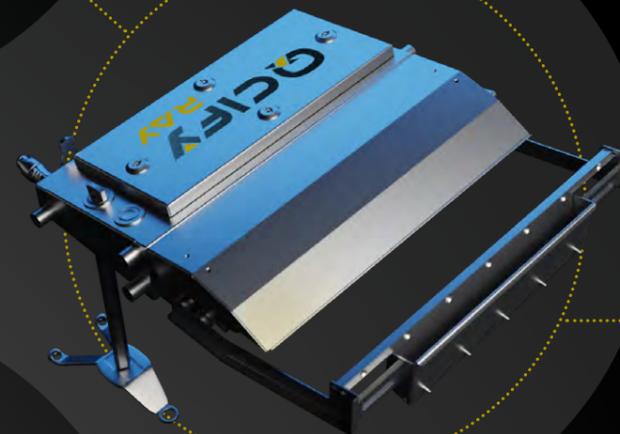

QCIFY EYE

A game-changing final quality control sorter. With precise air nozzle ejection, it integrates seamlessly into any line and installs easily with minimal downtime.

QCIFY RAY

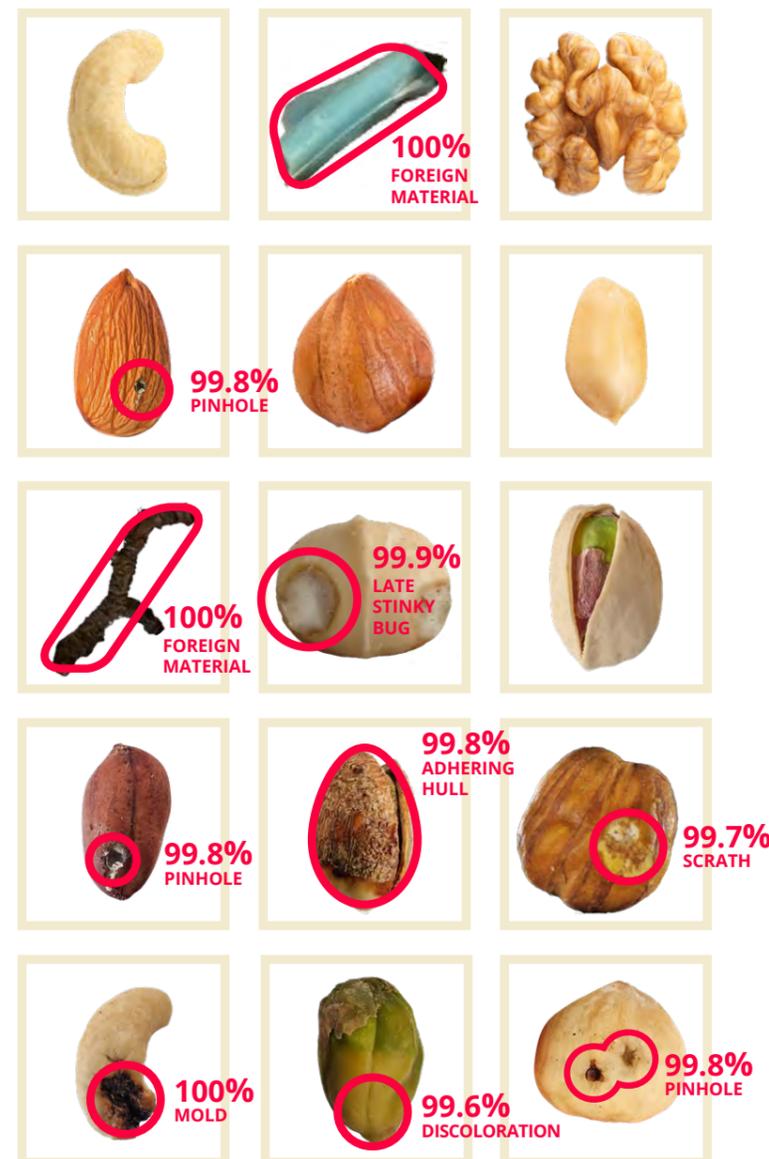

Place it anywhere, connect it to the HUB, and monitor your entire line with real-time notifications.

FM & DEFECT DETECTION

From the tiniest pinholes to the most stubborn foreign materials, the human eye is no match for our technology: nothing goes unnoticed by our machines.

We know all possible defects and contaminants in tree nuts, peanuts, and beyond.

DON'T TAKE IT FROM US

“What I like the most about the Qcify team is that they brought a lot of **innovations** and a lot of **fresh ideas to this industry.**”

*David Valenzuela
CEO Invernada Export SPA
Chile*

“The installation downtime was minimal, and the payback is huge. **I wish I had made a decision earlier.**”

*Stephan Le Roux
CEO of Robertson Almond Co.
South Africa*
